The City Staff continues to work with the USACE and Halff Associates in obtaining the required ROE agreements and engineering data. The agreement for the Third and Restated Agreement between the City of Wharton and the Lower Colorado River Authority (LCRA) has been executed by both parties. The amendment will incorporate Segment 1(a) into the project, which is the extension of the levee along FM 102.

City Staff and Mayor Montalvo attended a meeting in Austin to discuss progress and issues concerning this project on January 11, 2012. The City Staff will be meeting with the USACE and Halff Associates Representative to discuss the path being taken on the project.

DRAINAGE:

1. Santa Fe Outfall Channel.

The Public Works Department has finished excavation up to Alabama Road. The Public Works Department will now focus on installing grade stabilization structures and installing other best management practices needed to control erosion.

2. Highway 60 & Old Lane City Road Drainage Improvements

The construction plans have been approved by the TxDOT Yoakum District Office. City Staff has acquired the needed drainage right of way from Edwin Kostka. In addition to the drainage right of way an aerial easement will also be required. City Staff, Jones & Carter Inc., and Centerpoint Energy are working to finalize the aerial easement so that the poles can be moved. The Public Works Director has provided a set of construction plans to and met with AT&T and Texas Mid Gulf Cable as well. Staff is currently in the process of resolving all utility conflicts. City Staff met with an AT&T engineer on January 18, 2012 to discuss the engineering required by AT&T to move their cable on the North and South side of Highway 60. Progress is being made in resolving the utility conflicts.

WATER/SEWER IMPROVEMENTS:

1. Water Storage Tank Maintenance Program.

The Alabama Ground Storage Tank is complete. The Alabama tank passed engineering inspection. Bacteria testing on the Alabama GST came back negative and the tank is now back on-line. Currently the contractor is sandblasting the Vahalla Ground Storage Tank. Rehabilitation of the Vahalla GST should be complete by February. This will mark the completion of the project.

2. Pressure Switches at City Water Plants

This project is complete; however, the Public Works Staff continues to monitor the system to insure that it is working properly. Barbee Electric recently installed temperature control devices in the pressure switch boxes to create a controlled environment and help reduce problems with the switches. The temperature control devices seem to be eliminating most of our overflow problems. Staff will continue to monitor the situation.

3. Energy Efficiency Audit

Siemens Industry and Jones & Carter, Inc. presented an overview of their plan to help the City increase energy efficiency. Presentations were made to the Public Works Committee and Finance Committee in December.

4. Wastewater Treatment Plant No. 1 Rehabilitation Proposal

Jones & Carter, Inc. has completed their rehabilitation proposal and presented it to the Public Works Committee and Finance Committee in December for review.

5. On-going Water and Sewer Maintenance Program

Recent rainfall has caused the ground to begin to swell causing some water leaks and sanitary sewer issues. However, the number of problems encountered has decreased since the severe drought this past summer and fall. Currently the City is averaging about four leaks a week and around twice the problems normally associated with the sanitary sewer collection system.

The week of January 9, 2012 the motor on Water Well #3 at the Alabama plant failed. After examination, the technicians determined that the motor was not repairable. Therefore, an emergency purchase of a new motor plus installation was authorized by the Public Works Director and Finance Director. Total cost of the repair was \$8,420 and was completed by Layne Christensen Company. Electrical repair was also completed by Barbee Electric however an invoice has not been received from Barbee yet. The well is now back on-line and working properly.

STREET IMPROVEMENTS

1. FM 102 Relocation and/or FM 1301

A. Progress Report on Project.

IDC Inc. continues to work with City Staff in an effort to develop preliminary engineering for the project. TxDOT, IDC, SMC Consulting, Inc., and City Staff met on January 17, 2012 to prepare for the upcoming public meeting at the Civic Center on January 24, 2012. The group will meet again on January 23, 2012 to ensure all parties are prepared for the public meeting.

B. Update on status of Advance Funding Agreement (AFA) between the City of Wharton and the Texas Department of Transportation (TxDOT).

TxDOT has agreed to amend the AFA with an increase of \$200,000 making the States total support toward the project \$3,700,000 for construction. City Council passed a resolution accepting this amendment to the AFA. City Council also passed a resolution amending the professional engineering services agreement between the City of Wharton and IDC Inc. to include the basic engineering services for the environmental assessment for the City of Wharton FM 102 Relocation,

City of Wharton
Regular City Council Meeting
January 23, 2012

FM 1301 Road Extension to US 59 with service road and entrance ramp (east side) and Railroad Overpass. These adopted resolutions will allow City Staff to have better control over the environmental portion of the project and result in a more timely completion of the final engineering plans.

2. 2011 Street Improvement Program

Public Works Staff is currently identifying and preparing cost estimates for possible street improvements in 2011-2012.

3. Wharton Sidewalk Accessibility and Historic Streetscape Project

City Staff, BEFCO Engineering, Stern and Bucek Architects and TxDOT are working together to ensure this project is a success. Currently BEFCO Engineering is surveying and developing some of the preliminary designs. David Bucek is consulting with BEFCO and City Staff on various issues including historical aspects of the project. City Staff is currently reviewing preliminary plans with BEFCO.

4. On-going Street and Drainage Maintenance Program

The recent rainfall combined with the damage caused by the drought is keeping the Street and Drainage crew very busy. The force of the ground shrinking from drought and swelling from rain is causing numerous failures in the City's streets and storm sewers. Many of the failures must be fixed immediately since they pose a threat to the public's safety.

The week of January 9, 2012 the City received several inches of rain in a short amount of time. Public Works staff noted that the Santa Fe outfall ditch performed as intended and helped drain the City more efficiently than we have seen in the past. In addition, residential ditch cleaning projects have proven worthy as well. This was measured by the decreased need for barricades at flooded intersections and visually noting that water no longer stands in ditches that have been reworked.

OTHER PROJECTS

1. Fire Station Expansion Project

The Public Works Department recently completed construction of a concrete pad to accommodate two garbage dumpsters for the Fire Department.

WHARTON REGIONAL AIRPORT

1. Capital Improvement Drainage Project.

O'Malley is currently making the final design changes. This project should be bid out within the next 30-60 days.
